

PADI Rescue Diver Course

OVERVIEW

Rewarding and fun - this best describes the PADI Rescue Diver course. This course will expand your knowledge and experience level: Rescue Divers learn to look beyond themselves and consider the safety and wellbeing of other divers. Although this course is serious, it is an enjoyable way to build your confidence.

The PADI Rescue Diver certification is a prerequisite for all **Professional level PADI courses**, beginning with the PADI Divemaster certification. Contact us to enrol in a PADI Rescue Diver course and prepare yourself to Go Pro.

The **Master Scuba Diver certification** also requires that you have Rescue Diver certification. This is the highest non-professional level in PADI and is attained when you have Rescue Diver certification, 50 logged dives and five PADI Specialty certifications.

PREREQUISITES

- You can enrol in the Rescue Diver Course as a certified Open Water Diver (or have a qualifying certification from another training organisation) and participate in the Rescue Diver knowledge development and rescue training sessions, in confined water only.
- To participate in the rescue training sessions in open water, and to participate in the open water rescue scenarios, you must be certified as a PADI Advanced Open Water Diver or have a qualifying certification from another training organisation.
- Minimum age: 15 years old (12 for PADI Junior Rescue Diver)
- Successful completion of a sanctioned CPR program within the past 24 months. The PADI Emergency First Response Primary Care (CPR) and Secondary Care (First Aid) courses meet this requirement.

COURSE DETAILS

Rescue Diver training will prepare you to prevent problems and, if necessary, manage dive emergencies. During the open water sessions, you will cover:

- Self-rescue and diver stress
- AED and emergency oxygen delivery systems
- Diving first aid
- Swimming and non-swimming rescue techniques
- Emergency management and equipment
- Panicked diver response
- Underwater problems
- Missing diver procedures
- Surfacing the unconscious diver
- In-water rescue breathing protocols
- Egress (exiting the water with an injured diver)
- First aid procedures for pressure related accidents
- Dive accident scenarios

The Rescue Diver course runs over one evening and two days.

Evening Session – Theory at Dive World.

Day 1 – Rescue techniques in the pool

Day 2 - Open water to practice techniques and participate in real life rescue scenarios.

COURSE COSTS

- Rescue Course only - \$425 including GST
- Rescue Course and Emergency First Response - \$625 including GST

Course Cost Includes:

- PADI materials, including manual
- Certification fees
- Training with a Dive World PADI Instructor
- Air fills

WHAT YOU WILL NEED TO BRING

- At this level of training you should be thinking about having your own diving gear. However if you do not have your own gear, we can supply rental equipment at a reduced hire price.
- Personal items such as sun screen, swimming garments and towel
