

PADI Wreck Diver SPECIALTY

PREREQUISITES

- PADI Advanced Open Water
- Dive Equipment (rental equipment is available for hire or see below for special discount on purchases)

COURSE DETAILS

The Wreck Diver Speciality course is completed over two days. Dive World can facilitate personalised courses which can be scheduled to suit individual needs.

Day 1 - You will spend today doing dives 1 and 2 around the wreck.

Dive 1:

- Swim on the outside of a wreck maintaining proper buoyancy control and identifying and avoiding potential hazards under the direct supervision of a Dive World PADI Instructor
- Navigate on a wreck so that the ascent point can be located without surfacing
- Maintain neutral buoyancy and body position so that the bottom is avoided

Dive 2:

- Swim along the outside of a wreck in a buddy team, identifying and avoiding potential hazards
- With a buddy, map a wreck (or portion of a wreck) determining approximate size and marking points of interest
- Survey a wreck for a penetration dive and evaluate possible entrances
- Navigate on a wreck, returning to the ascent point without surfacing.

Day 2 - It is time to start preparing for the penetration.

Dive 3:

- Demonstrate the deployment and retrieval of a penetration line outside of a wreck
- Swim along the deployed penetration line so as to maintain contact with the line without kicking up silt and holding on to a dive light
- Navigate on a wreck so that the ascent point can be located without surfacing.

Dive 4:

- Plan and perform an actual wreck penetration under direct supervision, determining air supply and penetration limits
- Swim without causing excessive silt disturbance, whilst maintaining contact with the line
- Use a dive light while following a penetration line and navigate on a wreck so that the ascent point can be located without surfacing

That's it! After day two you will be certified to penetrate wrecks.

FURTHER EDUCATION

To continue your training from here, it's time to think about Enriched Air or the Deep Speciality – or maybe you are ready to become a Divemaster! Dive World facilitate all of these PADI programs and more – speak to a Dive World Professional today about furthering your PADI education.

COURSE COSTS

Option One – Wreck Speciality Program \$550 including GST

Run over one weekend, the wreck speciality course will enable you to penetrate wrecks safely

Option Two – Wreck/Nitrox Combo \$795 including GST

This extra Speciality runs during the same weekend and will entitle you to use Enriched Air up to 40%, extending your wreck dive time

Option Three - One-on-One Program \$1050 including GST

Do you work weekends or prefer learning in a more personalised, one-on-one environment? Imagine having your own, personal PADI Dive Instructor teaching you this Speciality. You get two days of training and individual attention, running on your schedule. If you want to do the Wreck/Nitrox Combo, the price is \$1295 including GST.

Course Cost Includes:

- PADI materials
- Certification fees
- Classroom training with a Dive World PADI Instructor
- 4 x open water dives on a wreck

Not Included:

- Dive equipment (this can be hired out during the course – a Dive World Professional can provide you with rental prices)

WHAT YOU WILL NEED TO BRING

- Your completed Knowledge Reviews
- A valid diving medical (AS4005.1)
- Personal items such as sun screen, swimming garments, towel and dive equipment
- Packed lunch or money for lunch during the day
- Dive torch and Wreck penetration line
